

Mission Aligned--Quality Driven

Innovative Cloud Computing

Federal Engineering Delivery’s (FEDelivery) cloud computing services are tailored to the needs of our clients. Whether you are looking for digital solutions, developing new management services, or modernizing your technology infrastructure, we can help.

Our core competencies include:

Cloud Architecture & Strategy: Federal Engineering Delivery partners with clients to plan, implement, and accelerate their migration to a cloud-based architecture. Our “Cloud Selection Strategy” utilizes best-in-class tools which can discover assets and measure workload performance to determine system requirements. We leverage those requirements to develop an end-to-end transition plan. Our professional solutions architects provide deep expertise in the cloud segment and are experienced scaling up organizations to become cloud-native. As with all of our projects, security and functionality are always a priority. We deploy high quality implementation tools to create lightweight but secure cloud networks including VPC management, VM patching, OS guidance, Identity & Access Management controls (IAM), and firewall rules.

Cloud Migrations: Federal Engineering Delivery streamlines cloud migrations of any size. Our team performs a comprehensive 360° assessment, combining client requirements, technical discovery, and dependency mappings to develop a personalized migration plan. Our migration process includes an end-to-end tracking dashboard, virtual cloud training resources, post-migration performance assessment and support. Whether you need to migrate a legacy application or convert to a microservice architecture, our specialists have a world class understanding of software architecture knowledge. To ensure usability, correctness, and stability our resources are experts in the “DevOps” process to ensure all operational upgrades and migrations happen in-place without unnecessary downtime.

CLIENTS SUPPORTED

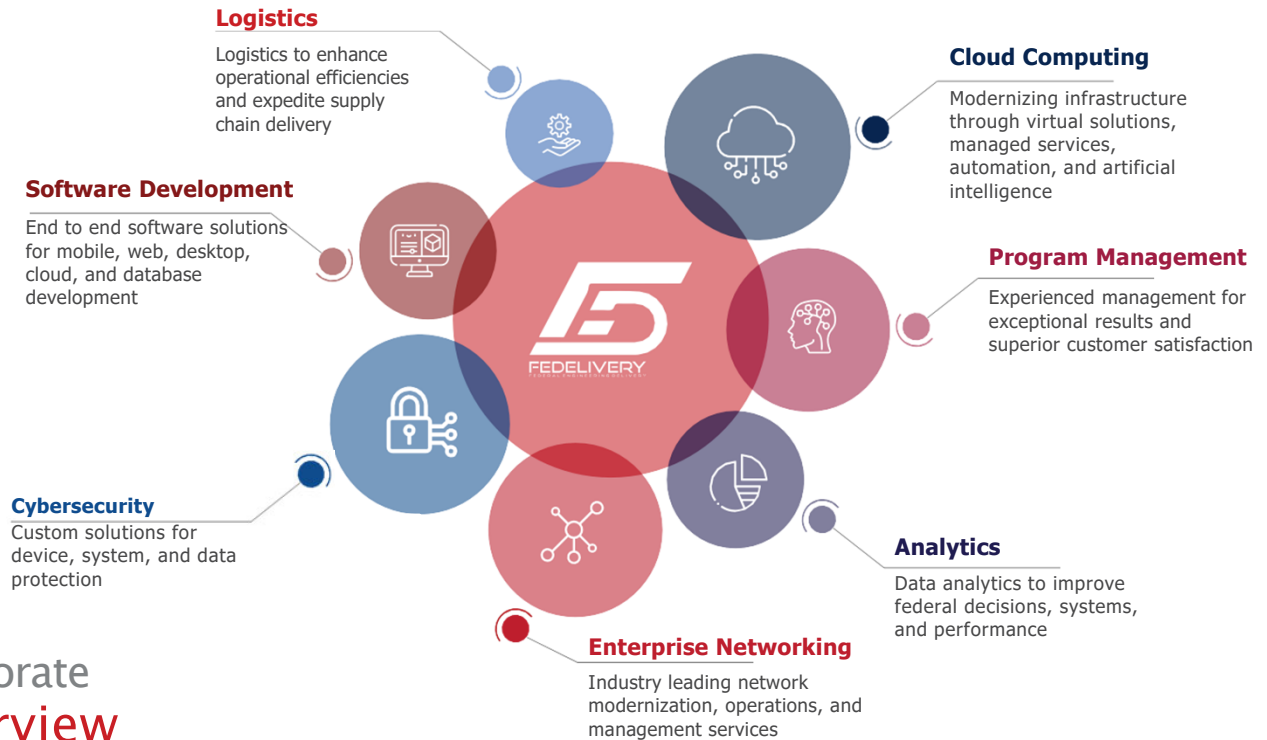

Managed Cloud Services: Federal Engineering Delivery excels client cloud adoption by providing a modern cloud management core for maximum cybersecurity awareness, operational transparency, computational efficiency, and virtual machine management. Our solutions are FedRAMP compliant and support major cloud providers such as milCloud 2.0, Microsoft Azure, and Amazon Web Services (AWS). Sometimes it isn’t feasible to create, manage, and own cloud infrastructure on top of the workload of existing projects. For the right projects We recommend the right managed cloud services based on the needs of the client. Our team are managed-cloud experts who boast numerous certifications working in cloud-native environments. Our pledge is to ensure the best solution at the best cost.

Cloud Capabilities: Federal Engineering Delivery’s team are experts in numerous cloud computing “no code” and “low code” paradigms including Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS). We help your team tackle the toughest problems. Our specialists are industry experts who know the complex suite of technology frameworks, services, and software offerings that already exist. For the right projects we can dramatically cut project development time by up to 90% by utilizing existing software platforms and engineering additional capabilities on top of them.

Service Offerings

Federal Delivery Engineering provides comprehensive enterprise management, operations, and modernization services for the most critical initiatives.

Corporate Overview

Federal Delivery Engineering is a **Historically Underutilized Business Zone (HUBZone)**, **ISO 9001**, **ISO 271001**, and **ISO 31000** certified company.

NAICS, DUNS, CAGE

- 541330 – Engineering Services
- 541512 – Computer Systems
- 541511 – Computer Programming
- 541611 – General Management
- 541614 – Logistics Process
- DUNS - 080045874
- CAGE – 7H8S7

Maturity

- ISO 9001, 27001, 31000 certified
- DCAA accounting
- Innovative recruiting & retention
- Competitive employee benefits

Personnel

- 100% advanced certifications
- 100% cleared
- Emerging Technology SMEs with an average of 15+ yrs. experience

Background

- HUBZone Certified
- Established in 2015
- Average of 121% annual growth

Experience

- Customers include Department of Defense, Patent and Trademark Office, Joint Services Provider to the Pentagon
