

Mission Aligned--Quality Driven

**Robust
Cybersecurity**

Federal Engineering Delivery (FEDELIVERY) creates custom cybersecurity solutions for our clients. Our solutions provide device, system, and data protection through assessments, threat detection, response, and recovery.

Our core competencies include:

Cybersecurity Assessments: Federal Engineering Delivery’s vulnerability and security assessments provide a comprehensive valuation of existing vulnerabilities in an organization based on their current security posture. We verify our client’s compliance with security regulations, conduct a gap analysis per the ANSI/ASIS/RIMS standard, identify vulnerabilities, conduct asset discovery, and baseline security controls to enhance our client’s ability to identify and respond to cybersecurity incidents.

Threat Detection: Federal Engineering Delivery’s cyber security services rapidly recognize threats to reduce access to sensitive information. We are experts in the global threat landscape and remain vigilant by leveraging threat intelligence for the latest attack vectors. Our threat detection offering includes security event, network threat, and endpoint threat detection services.

Incident Response: Federal Engineering Delivery helps its clients create and maintain a fast, reliable, and scalable incident response plan. Our plans implement a detect, analyze, respond, and recover approach to create a systemic cyber response. We use proven systems, tools and experts to identify, minimize impact, and recover from cybersecurity incidents. Our solutions create rapid incident resolutions so our clients can continue without further interruption.

**CLIENTS
SUPPORTED**

Penetration Testing: Federal Engineering Delivery performs Pen testing of client networks to identify vulnerabilities within the network and offer proprietary solutions. Our team of network engineers will scan the frontend and backend of servers, API’s for internal and external testing. Our solutions will optimize the Security and stability of our clients’ application/network for an ever-changing landscape.

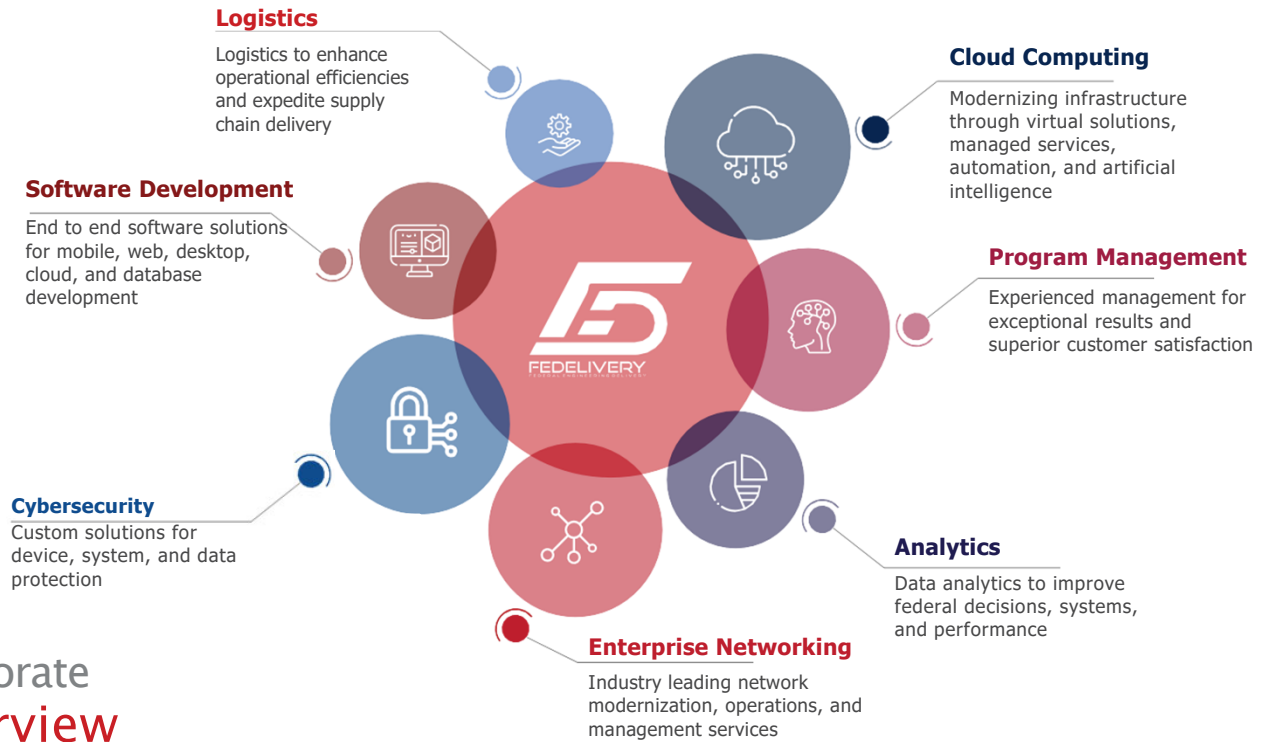

Cybersecurity Training: Federal Engineering Delivery can provide best in class enterprise training to all level of employees on IT best practice. Our training brings awareness and vigilance to external the IT organization to increase cyber hygiene. The security of a network begins with the internal users and their knowledge and vigilance of external threats, such as social engineering.

Compliance: Federal Engineering Delivery supports the ongoing compliance of data security and privacy in accordance with PCI Data Security Standards (PCI DSS), GDPR, HIPAA, E13PA, GLBA FFIEC, NIST 800-53.

Cloud Security: Federal Engineering Delivery’s services provide federal agency’s guidance and optimization of Cloud security. System misconfiguration is the top reason for a Cloud vulnerability. Our team of engineers and solutions Architects will map out the existing configuration and processes and ensure a “Hub and spoke” security model is implemented.

Service Offerings

Federal Delivery Engineering provides comprehensive enterprise management, operations, and modernization services for the most critical initiatives.

Corporate Overview

Federal Delivery Engineering is a **Historically Underutilized Business Zone (HUBZone)**, **ISO 9001**, **ISO 271001**, and **ISO 31000** certified company.

NAICS, DUNS, CAGE

- 541330 – Engineering Services
- 541512 – Computer Systems
- 541511 – Computer Programming
- 541611 – General Management
- 541614 – Logistics Process
- DUNS - 080045874
- CAGE – 7H8S7

Maturity

- ISO 9001, 27001, 31000 certified
- DCAA accounting
- Innovative recruiting & retention
- Competitive employee benefits

Personnel

- 100% advanced certifications
- 100% cleared
- Emerging Technology SMEs with an average of 15+ yrs. experience

Background

- HUBZone Certified
- Established in 2015
- Average of 121% annual growth

Experience

- Customers include Department of Defense, Patent and Trademark Office, Joint Services Provider to the Pentagon
