

Mission Aligned--Quality Driven

**Secure & Pragmatic
Software Engineering**

Federal Engineering Delivery (FEDelivery) provides end-to-end software solutions for mobile, web, desktop, cloud, and database platforms. Our team develops comprehensive and personalized solutions to envision new systems or modernize legacy applications.

Our core competencies include:

Software Support: Federal Engineering Delivery provides application support to both end users, agencies, and operations. We conduct a rigorous suite of tests including penetration testing, integration testing, stress testing, and functional user acceptance testing to verify systems are performing within expected parameters. They focus on creating scalable solutions even through unexpected failure scenarios. At FEDelivery, we provide operational runbooks and industry-standard code documentation to ensure a smooth transition of software. We are ready to serve and provide robust software application support even through future feature development and enhancements.

AI & Automation: Federal Engineering Delivery harnesses the power of Artificial Intelligence (AI) to provide advanced capabilities for federal agencies and their teams. Our data engineers have the experience to craft complex and high-velocity automated Extract Transform and Load (ETL) pipelines. No matter what your data source is: database, Excel worksheets, or any format – our team at FEDelivery will create clean data which can feed into a variety of AI applications. Our team of engineers and data scientists are experts in using Machine Learning (ML) to develop cutting-edge systems capable of producing real time predictions. These predictions allow our clients to generate advanced insights whether it be for forecasting, time-series analysis, or categorization. We target high-value automations to ensure the right investments are being made on every project.

**CLIENTS
SUPPORTED**

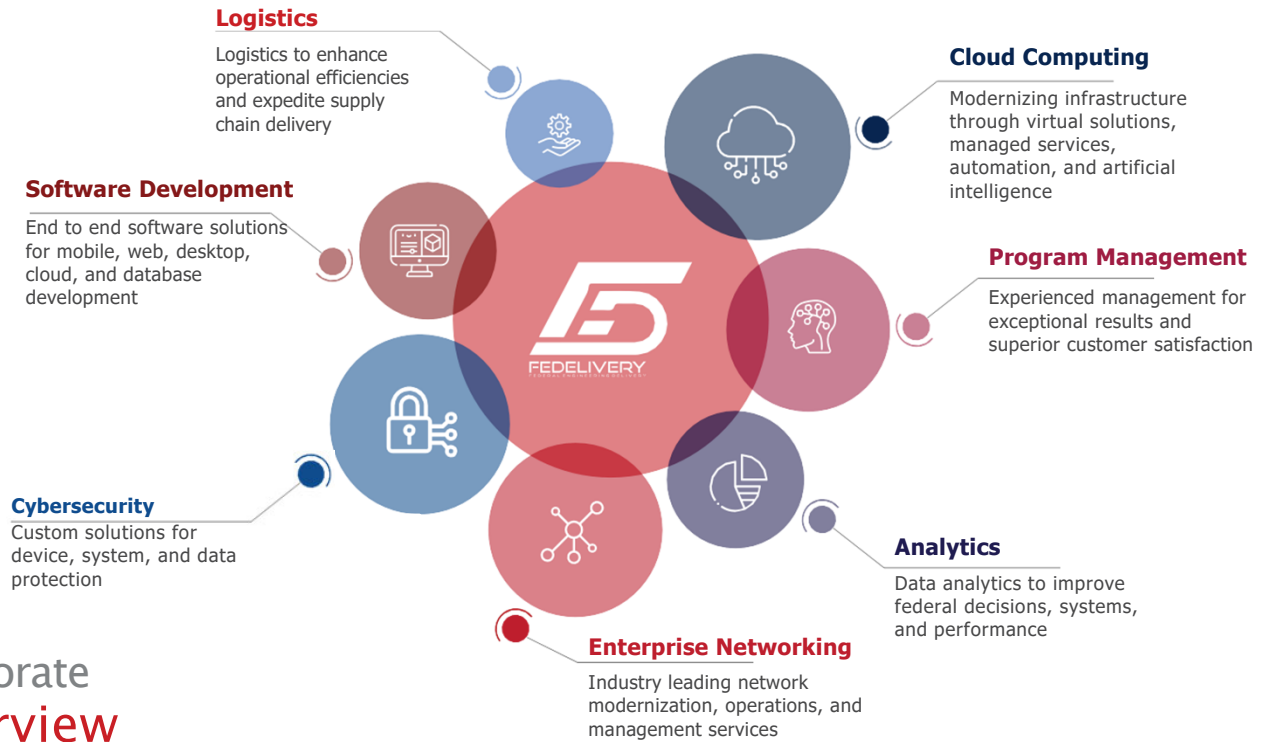

Web Development: Federal Engineering Delivery provides world-class software development services by analyzing front-end, back-end, server hosting, and integration environment needs to develop a custom solutions We utilize industry-standard programming languages to tackle any problem and deliver performant, maintainable systems. Best-in-class frameworks in Java, C#, Python, PHP, ASP.NET, SQL, JavaScript, and HTML/CSS allow us to craft dynamic full-stack web applications to support multi-user login, distributed database connections, domain-specific logic, or custom API integration. We have the experience to support the development of production-ready mission-critical programs. We also have experience working with applications written in legacy languages such as COBOL and ADA.

Mobile Development: Federal Engineering Delivery provides top-class mobile app development on both iOS and Android for federal agencies. We leverage government approved APIs and Software Development Kits (SDKs) to promptly deliver functional mobile applications with a focus on security. Our robust and cutting-edge frameworks allows us to design sleek and modern apps which cater to individual use cases without sacrificing on usability. At FEDelivery, we will modernize old applications or create new ones for phones, tablets, or many disparate devices. This experience allows us to deliver complex and domain-specific applications at scale which can support a variety of native-mobile integrations such as Bluetooth.

Service Offerings

Federal Delivery Engineering provides comprehensive enterprise management, operations, and modernization services for the most critical initiatives.

Corporate Overview

Federal Delivery Engineering is a **Historically Underutilized Business Zone (HUBZone)**, **ISO 9001**, **ISO 271001**, and **ISO 31000** certified company.

NAICS, DUNS, CAGE

- 541330 – Engineering Services
- 541512 – Computer Systems
- 541511 – Computer Programming
- 541611 – General Management
- 541614 – Logistics Process
- DUNS - 080045874
- CAGE – 7H8S7

Maturity

- ISO 9001, 27001, 31000 certified
- DCAA accounting
- Innovative recruiting & retention
- Competitive employee benefits

Background

- HUBZone Certified
- Established in 2015
- Average of 121% annual growth

Personnel

- 100% advanced certifications
- 100% cleared
- Emerging Technology SMEs with an average of 15+ yrs. experience

Experience

- Customers include Department of Defense, Patent and Trademark Office, Joint Services Provider to the Pentagon
