

Mission Aligned--Quality Driven

Agile Logistics

Federal Engineering Delivery (FEDELIVERY) supports federal agencies with their logistic initiatives to enhance operational efficiencies and expedite supply chain delivery with minimal errors.

Our core competencies include:

Transportation: Federal Engineering Delivery solutions deliver local transportation support systems to federal agencies in the northern Virginia, Maryland, and Washington D.C. locations. We work in tandem with our supply chain and warehouse teams and create a comprehensive logistics process.

Supply Chain Optimization: Federal Engineering Delivery provides warehouse and supply chain technology support to federal agencies. We use simulation software (Integrated Logistic Support) to create a supportable, low cost, and reliable supply chain infrastructure design. Software is used continuously after design implementation to maximize efficiencies and modify based on agency requirements.

Warehouse Services: Federal Engineering Delivery’s solutions create efficient space management designs and instill processes that reduce delays and costs.

Technology: Federal Engineering Delivery leverages logistical tools and the federal agencies current supply chain maps to address supply chain flows, enhance service levels, and create alternate supply chain paths for competitive efficiencies.

Change Management: Federal Engineering Delivery understands the level of buy in from all levels of an organization needed to ensure new strategies are adopted. Thus, our team offers experienced change management practitioners to engage all level of stakeholders and ensure they buy into the newly adopted vision. The change Managers will communicate and train employees to foster a culture of continuous improvement.

CLIENTS SUPPORTED

Operational Readiness and Sustainment: Federal Engineering Delivery provides operational and sustainment logistics support through logistic management documents: Our documents include operational readiness assessment, asset availability analysis, product support plan, and the Product Support Strategy (PSS).

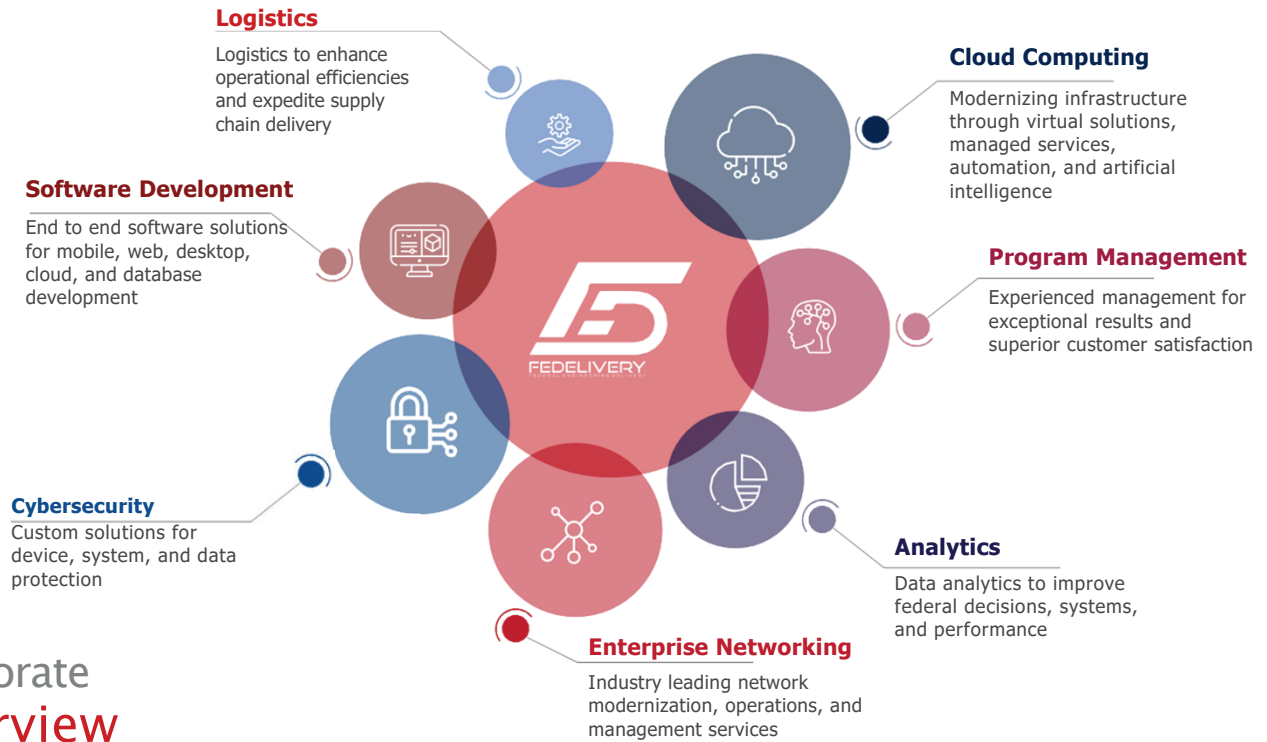

Supply chain Advisory: Federal Engineering Delivery provides a customized review of the entire supply chain life cycle and pinpoints areas of improvement. Our team of industry experts will provide cost saving tactics and best in class sourcing strategies to ensure each process is lean and efficient.

Market Research: Federal Engineering Delivery Stands ready to deliver best in class market research to ensure our clients have a complete understanding of the market data. Our team will compare sourcing and distribution costs of the various regional and international suppliers to give our clients the best options.

Carbon Footprint Analysis: Federal Engineering Delivery is committed to the sustainability and preservation of the environment. Our team can provide a full analysis of our clients current Carbon footprint from their distribution model. Once a Carbon footprint is determined, our team will provide alternate strategies and solutions to reduce it.

Service Offerings

Federal Delivery Engineering provides comprehensive enterprise management, operations, and modernization services for the most critical initiatives.
